

# Documentation

Mako ships with complete API documentation generated with [Doxygen](#). It's found in the Documentation folder. Unzip mako-doc.zip then use your browser to open html/index.html.

The complete HTML documentation is online [here](#).

You can also download this PDF version.

The PDF can be searched very quickly with Ctrl+Shift-F in Adobe Acrobat, as it contains an embedded index. However, Adobe now require a system change to enable searching of an embedded index. See <https://helpx.adobe.com/acrobat/kb/enable-embedded-index-to-search-pdf.html> for details.
